

Dallmeier IP cameras integrated into SeeTec software

IP cameras by German manufacturer Dallmeier are now also integrated into SeeTec's management software.

"Owing to their open system architecture our products can be connected to third-party systems without any problems. We have always been mindful of an open platform", says President & CEO Dieter Dallmeier. "The integration into the SeeTec software is further proof of how quickly and easily our products can be integrated."

As a pioneer and technological innovator in the area of network-based video surveillance SeeTec developed the first full IP Video Management solution more than 10 years ago. The software, which is now in its fifth generation, offers a powerful management platform that supports camera hardware from all of the leading manufacturers. The current software SeeTec 5, version 5.2.12, supports the Dallmeier network cameras DF3000IP and DDF3000IPV.

Ulrich Heissler, head of technical development at SeeTec, explains the move: "With the integration of the Dallmeier cameras SeeTec expands its hardware portfolio by another German manufacturer of high-value IP cameras. We are very pleased about the cooperation with that established company and we are sure that this collaboration will bring additional benefits to our customers amidst a rapidly growing market."

About SeeTec:

As a pioneer and technological innovator in the area of network-based video surveillance, SeeTec developed the first full IP Video Management solution more than 10 years ago. The software, which is now in its fifth generation, offers a powerful management platform that supports camera hardware from all of the leading manufacturers. The company has also developed specific solution packages for use in the retail, financial and logistic sectors. Throughout Europe, many well-known companies and organisations use the SeeTec software, for example the SPAR supermarket chain in Austria, the ARAG Insurance Company and the Swiss national railway company. SeeTec products are sold and distributed through partners in the IT and CCTV business. Throughout the year, the company holds partner seminars offering an extensive know-how transfer forum. As well as the headquarters in Philippsburg, SeeTec has subsidiaries in Vienna, Lucerne and Paris. More locations are in the planning stage.

About Dallmeier

Dallmeier has at its disposal more than 25 years of experience in transmission, recording as well as picture processing technology and is an outstanding pioneer of CCTV/IP solutions worldwide. This profound knowledge is used in the development of intelligent software and high quality camera technology enabling Dallmeier to not only offer stand-alone systems, but complete network solutions up to large projects with perfectly integrated components. Right from the beginning the company always focused on own innovative developments and highest quality and reliability. This and the extensive experience in the CCTV and IP field have lead to rapid growth and allowed a top position on the international market for video surveillance systems.
